

Econotech Dan, PJD1743

Senior seedstock sire

R782 SBI (economic selection index) (in top 1% of SA 2019 crop)

Strong on fertility, calving ease and a low mature cow weight (MCW)

Semen and embryos available.

Econotech Dan, PJD1743, has the breeding qualities with which we can take our seedstock operation forward. High fertility is the outstanding trait of Dan. He achieves this under extreme grazing conditions. Dan's fertility trait comes from a low to moderate mature cow weight, high body condition values, and a high scrotal size (essential for early maturity of heifers).

Dan has been sired by Simberg Zolerz P, JS1236. Zolerz again was sired by the well-known Blinkbou Herz. The latter was a grandson of the world famous Eisenherz, an AI bull from Germany and widely used in Southern Africa as well as the USA and Canada. On his mother's side Dan has also two famous sires, namely Kykso Kalhei (renowned for calving ease) and Kwantum Profeet (one of SA's first curve benders with a low birth weight and excellent growth). Furthermore, Dan hails from very fertile cow families. Six out of seven cows in his pedigree had seven or more calves in their respective lives.

In summary his economic indexes for SBI (Simmental Breeders Economic Selection Index) and SPI (index for cross breeding) are both in the top 1% of the SA 2019 crop.
